

PlugxPwn Workshop

Date: 21st June 2025

Speaker: Ms. Casey

Overview: The Plug x PWN Workshop was a hands-on technical session conducted for 50 participants, focusing on practical cybersecurity tools and concepts. Participants were introduced to BadUSB, Havoc C2, and OpenELM, gaining exposure to real-world applications in offensive security and threat simulation. The workshop provided an interactive learning environment that strengthened participants' technical understanding, problem-solving skills, and awareness of cybersecurity practices.
